Adjust image sharpness with focus wheel

Use yellow push buttons for desired illumination level

Position the trocars and insert the instruments

For Single Port, rotate cover

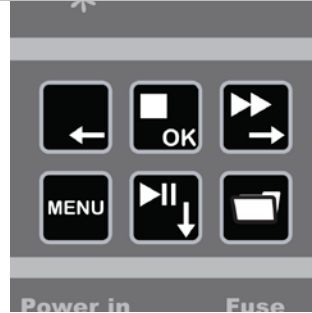

**-Service and warranty-**

\*A certified engineer must do all service to the system. If any service is required you should contact your dealer first. Your dealer will care for any service, modification or repair on the system. \*If any services, modifications or repairs are done by the end-user (without permission of the dealer) or another third-party, warranty will void. \*This system operates on 230V/50Hz. Be sure that the system is set up in a dry environment. Prevent water or moisture getting in the Lapstar box. \*Always use a power socket which is connected to ground. \*When the system is not used, be sure it is stored in a dry and ventilated room. \*We advise to deliver the system to your dealer for service once a year. During the service the system will be checked for operation, safety and any possible wear.

How to use the Lapstar\* *timer, record functions*
